KnexIQ™

Wireless authentication reader & latch control module

Boost your access control systems IQ by making any lock an intelligent lock. With the addition of a **KnexIQ** module, latches and door strikes become prox card, fob, smartphone and keypad enabled. Easily set up user parameters via a web portal or smartphone. Enjoy enterprise wide management from anywhere while viewing audit trails and access attempts.

DC or battery power → **KnexIQ™** → **Latch or door strike of choice**

Latch mechanisms controlled:
Southco, HES, Adams Rite and other industry standard latches and door strikes.

Set Up and Management:
Multiple levels of connectivity allows user to control via keypad, smartphone app, or enterprise portal.

Portal:
ProxTraq or MobileTraq. (details on back page)

Smartphone App:
ProxTraq, initializes and updates lock parameters and eliminates device programming.

Compatibility:
Compatible with 125KHz & 13.56MHz RFID Prox cards, fobs and stickers. Use existing prox cards or RFID devices. Enroll hundreds of users.

Installation:
Externally mounted to enclosures & doors.

Power:
12 or 24 VDC powered or battery operation.

Power conservation:
Low power sleep mode extends battery life.
